

TubePoint GEN2 – Luminaire range for traffic tunnels

TubePoint gen2

Many tunnel authorities have an outdated tunnel-lighting installation that urgently needs to be replaced, but have only limited budget available. We are able to fulfil their requirements. TubePoint GEN2 is the result of years of experience in tunnel lighting combined with the latest technologies developed by Philips. With its modular design and modern LED architecture, TubePoint GEN2 is a versatile, cost-effective luminaire that meets the most stringent tunnel-lighting requirements. It is made of highest-quality components that are dedicated for tunnels, thus ensuring a long lifetime, good performance and low maintenance costs. The efficiency and wide choice of optics means that the number of luminaires can be reduced significantly compared with a conventional solution. And a high lumen per watt ratio at system level improves the total cost of ownership. TubePoint GEN2 is part of Philips' TotalTunnel solution for a complete tunnel lighting.

Benefits

- Flexible mounting solution, quick release for easy maintenance
- Easy-connect, a wide range of connectivity options
- Excellent quality optics, longer distance between luminaires
- Fast payback
- Equipped with a service tag, a QR-based identification system that makes each luminaire uniquely identifiable and provides maintenance, installation and spare part information

TubePoint gen2

Features

- Direct replacement of existing conventional luminaires (Lumen packages exceeding SON-T 400 W)
- Flexibility in application thanks to a range of lumen outputs and tunnel optics
- Compatible with Philips' tunnel controls and options for third-party controls
- Option of remote driver for quick and easy maintenance
- Wide choice of mounting systems

Application

- Traffic tunnels and underpasses

Versions

TubePoint GEN2 Small
